

Social development

MFL supports social development by encouraging pupils to work proactively and co-operatively in pairs and groups. Pupils are encouraged to experiment in a safe environment and mistakes are seen as learning opportunities. Pupils are able to make links with vocabulary across a range of languages that we speak and contribute to performances with each other.

Moral development

Pupils are taught to combat prejudice and develop tolerance by developing an understanding of how others live. We discover how to dispel stereotypes and myths about other cultures and how we respect other cultures and their diversity. We explore issues in a global society and the equality of education across the world. We explore international projects such as Refugee Week and how we should learn many languages in order to communicate effectively.

SMSC in MFL

Spiritual development

Pupils will show respect for other cultures and their values. The pupils are educated on the religious beliefs of the people in the Spanish speaking countries and how this is similar to our beliefs and how we value language as communication. This gives the pupils opportunity to consider 'identity' and what it means to them. We look at the mixture of languages we speak in our class context and how proud we are of our heritage.

Cultural development

To compare similarities and differences between our culture and another and respect cultural diversity. We celebrate ourselves as citizens of Europe and the wider world and focus on this during European Languages Day. We consider special events and festivals from a range of cultures to embrace heritage and participate in visits to China Town, Spanish visitors.
